Course Description

AMOS Virtual Classroom

Work Steps & Work Templates

Course Description	This course is designed to explain Work Steps and how to create, adjust and update them. Together with the program Work Step Repository you will setup a Work Step, add it to a Maintenance Event, revise it and add some details to it. You will also learn how to update the Event, the linked Wororder and the future pendings. With the Work Template Manager you will learn how to create, compare, link and revise Work Templates.
Course Objectives	Upon completion of this course, you will be able to: ✓ Understand the logic of Work Templates & Work Steps ✓ Setup Work Templates in different programs ✓ Update Work Templates ✓ Compare Versions of Work Templates using the Work Template Viewer ✓ Use Work Steps ✓ Use the Work Step Repository ✓ Understand Licences & Workflows in connection with Work Templates and Work Steps
Duration	2.5 – 3 hours incl. breaks
Who should attend	Everybody who works with Work Templates & Work Steps
